
Glossary and Abbreviations

Executive Summary	ES1
1.0 Introduction	
1.1 Overview	1.1
1.2 EIS Objectives	1.1
1.3 Proponent Details	1.1
1.4 Project	1.3
1.4.1 Project Title	1.3
1.4.2 Project History	1.3
1.4.3 Open Cut Project Plans	1.3
1.4.4 Proposed Open Cut Operations	1.5
1.4.5 Open Cut Project Schedule	1.5
1.5 Environmental Assessment Process	1.5
1.5.1 Northern Territory	1.5
1.5.2 Commonwealth Government	1.7
1.6 Relevant Government Legislation and Policies	1.8
1.6.1 Legislation	1.8
1.6.2 Policies	1.9
1.7 Land Tenure	1.11
1.7.1 Mining Tenements	1.11
1.7.2 Potential for Additional Development	1.12
1.8 Report Structure	1.12
2.0 Objectives and Benefits	
2.1 Market Opportunities for Zinc	2.1
2.2 Project Need	2.2
2.3 Project Benefits	2.3
2.4 Environmental Objectives	2.4
2.4.1 Xstrata's Health Safety Environment and Community Policy	2.4
2.4.2 MRM's Environmental Policy and Management System	2.5
2.4.3 Open Cut Project	2.5
3.0 Existing Operations	
3.1 Background	3.1
3.2 Management Systems	3.1
3.3 Mining	3.2

3.3.1	Ore Reserves	3.2
3.3.2	Mining Method	3.2
3.3.3	Underground Infrastructure	3.3
3.4	Processing	3.3
3.4.1	Secondary Crushing	3.3
3.4.2	Primary Grinding	3.4
3.4.3	Rougher Flotation	3.4
3.4.4	Regrinding	3.5
3.4.5	Cleaner Flotation	3.5
3.4.6	Thickening and Filtration	3.5
3.4.7	Tailings	3.6
3.5	Concentrate Storage and Haulage	3.6
3.5.1	Storage	3.6
3.5.2	Haulage	3.6
3.6	Bing Bong Port	3.6
3.6.1	Layout	3.6
3.6.2	Bulk Carrier	3.7
3.6.3	Transit Route	3.7
3.6.4	Ship Loading	3.7
3.6.5	Dredging	3.8
3.7	Workforce	3.9
4.0	Proposed Open Cut Operations	
4.1	Proposed Project	4.1
4.2	Mine	4.2
4.2.1	Overview	4.2
4.2.2	Pit Excavation	4.3
4.2.3	Test Pit Project	4.4
4.2.4	Pit Stability	4.5
4.2.5	Mining Activities	4.7
4.2.6	Interaction of Underground and Open Cut Operations	4.10
4.2.7	Industrial Facilities	4.10
4.2.8	Mining Schedule	4.11
4.3	Processing	4.13
4.3.1	Processing Facilities	4.13
4.3.2	Process Inputs	4.13
4.3.3	Process Outputs	4.14
4.4	Truck Transport	4.14
4.5	Bing Bong Port	4.15
4.6	Construction Activities	4.15

4.6.1	Pre-Construction Phase	4.15
4.6.2	On-Site Civil Construction	4.15
4.6.3	Flood Protection Bund Construction	4.16
4.6.4	Bund and Channel Construction Schedule	4.18
4.6.5	Construction Workforce	4.19
4.6.6	Construction Wastes	4.20
4.6.7	Construction Phase Environmental Management	4.20
4.7	Operational Workforce	4.20
5.0	Infrastructure	
5.1	Introduction	5.1
5.2	Accommodation	5.2
5.3	Water Supply	5.3
5.3.1	Accommodation Village	5.2
5.3.2	Mine	5.3
5.3.3	Bing Bong Port	5.3
5.4	Sewerage	5.3
5.4.1	Accommodation Village and Mine	5.3
5.4.2	Bing Bong Port	5.4
5.5	Roads	5.4
5.6	Airstrip	5.5
5.7	Power	5.5
5.8	Communications	5.6
6.0	Alternatives	
6.1	Introduction	6.1
6.2	Mining Method	6.1
6.3	Open Pit Optimisation	6.1
6.4	Pit Size	6.2
6.5	Industrial Facilities Location	6.2
6.6	Overburden Emplacement Facility Location	6.3
6.7	Processing Technologies	6.4
6.8	Environmental Management Technologies	6.5
6.8.1	Overburden Emplacement	6.5
6.8.2	Tailings Management	6.5
6.8.3	Drainage Realignment	6.6
6.9	On-site Zinc Metal Production	6.7
6.10	Transport and Port	6.7
6.11	Water Supply	6.7

6.12	Final Void	6.8
6.13	Workforce Accommodation	6.8
7.0	Waste Management	
7.1	Overburden Management – Existing Operations	7.1
7.2	Overburden Management – Open Cut Operations	7.1
7.2.1	Overview	7.1
7.2.2	Geochemical Nature of Overburden	7.2
7.2.3	Multi Element Nature of Overburden	7.5
7.2.4	Overburden Emplacement Facility	7.7
7.2.5	Perimeter Overburden Emplacement Facility	7.14
7.2.6	In-Pit Overburden Emplacement Facility	7.14
7.3	Tailings	7.14
7.3.1	Overview	7.14
7.3.2	Tailing Decant Management	7.14
7.3.3	Tailing Characterisation	7.16
7.3.4	Seepage	7.18
7.3.5	Groundwater Quality	7.19
7.3.6	Cell 1 Closure Strategy	7.19
7.4	Tailings Open Cut Operations	7.20
7.4.1	Overview	7.20
7.4.2	Tailings Deposition Method	7.21
7.4.3	Design of the Tailings Storage Facility	7.21
7.4.4	Water Management Dam	7.23
7.4.5	Decant Water Quality	7.24
7.4.6	Seepage Water Quality	7.24
7.4.7	Seepage Analysis	7.24
7.4.8	TSF Closure	7.27
7.4.9	Monitoring	7.29
7.5	General Operational Waste	7.29
7.5.1	Policy and Objectives	7.29
7.5.2	Waste Management Strategies	7.29
7.5.3	On-site Waste Management	7.30
7.5.4	Off-site Waste Management	7.31
7.5.5	Asbestos	7.32
7.6	Construction Wastes	7.32
7.7	Risk Assessment	7.33

8.0	Air Quality	
8.1	Climate and Meteorology	8.1
8.1.1	Long Term Climatic Records	8.1
8.1.2	Wind Direction and Speed	8.4
8.1.3	Extreme Events	8.5
8.2	Relevant Emissions	8.6
8.2.1	Suspended Particulates	8.6
8.2.2	Deposited Particulates	8.6
8.2.3	Oxides of Nitrogen	8.6
8.2.4	Carbon Monoxide	8.7
8.2.5	Sulfur Dioxide	8.7
8.2.6	Trace Metals	8.7
8.2.7	Volatile Organic Compounds	8.7
8.2.8	Greenhouse Gasses	8.7
8.3	Existing Emissions	8.7
8.4	Existing Air Quality	8.8
8.4.1	McArthur River Mine	8.8
8.4.2	Bing Bong	8.9
8.5	Emissions from Open Cut Operations	8.10
8.5.1	Fugitive Emissions	8.10
8.5.2	Point Source Emissions	8.11
8.6	Assessment Criteria	8.13
8.7	Dispersion Model	8.14
8.7.1	Overview	8.14
8.7.2	Modelling	8.14
8.7.3	Meteorological Data	8.14
8.8	Construction Impacts	8.15
8.9	Operations Impacts – Mine	8.15
8.9.1	Total Suspended Particulates	8.17
8.9.2	PM ₁₀ and PM _{2.5}	8.17
8.9.3	Oxides of Nitrogen	8.17
8.9.4	Sulfur Dioxide	8.18
8.9.5	Carbon Monoxide	8.18
8.9.6	Lead	8.18
8.9.7	Zinc	8.19
8.9.8	Volatile Organic Compounds	8.19
8.9.9	Seasonal Effects	8.19
8.9.10	Lighting	8.19
8.10	Operational Impacts – Bing Bong	8.20
8.11	Abnormal Operations	8.20

8.12	Mitigation and Monitoring Measures	8.20
8.12.1	Construction Phase Mitigation	8.20
8.12.2	Operational Phase Mitigation	8.20
8.12.3	Monitoring Program	8.21
8.13	Management Plan	8.21
8.14	Greenhouse Gas	8.22
8.14.1	Greenhouse Management Strategies	8.22
8.14.2	Existing MRM Greenhouse Gas Inventory	8.24
8.14.3	Projected GHG Inventory to 2012	8.25
8.14.4	Management of Greenhouse Gas Emissions	8.26
9.0	Noise	
9.1	Introduction	9.1
9.2	Existing Noise Levels	9.1
9.2.1	Ambient Noise at McArthur River Accommodation Village	9.1
9.2.2	Ambient Noise at Bing Bong	9.2
9.3	Noise Modelling	9.2
9.3.1	Methodology	9.2
9.3.2	Input Data	9.3
9.3.3	Receiving Locations	9.5
9.3.4	Meteorology	9.5
9.4	Predicted Noise Levels	9.6
9.4.1	Results for Existing Operations	9.6
9.4.2	Verification of Model	9.6
9.4.3	Results for Open Cut Operations	9.6
9.5	Noise Increases from Open Cut Operations	9.7
9.6	Operational Noise Impacts	9.8
9.7	Other Noise Impacts	9.8
9.7.1	Construction Noise	9.8
9.7.2	Traffic Noise	9.9
9.7.3	Blasting Noise and Vibration	9.9
9.7.4	Noise Impacts at Bing Bong	9.9
9.8	Noise Management	9.10
10.0	Terrain and Soils	
10.1	Geology	10.1
10.1.1	Regional Geology	10.1
10.1.2	Local Geology	10.1
10.2	Land Systems and Land Units	10.2

10.2.1	Geomorphology	10.2
10.2.2	Land Systems	10.4
10.2.3	Land Units	10.4
10.3	Soils	10.6
10.3.1	Physical Characteristics	10.6
10.3.2	Chemical Characteristics	10.8
10.3.3	Top Soil Management	10.8
10.4	Land Capability	10.10
10.5	Soil Erosion	10.11
10.5.1	Erosion Potential	10.11
10.5.2	Erosion Management	10.12
10.6	Seismicity	10.14
10.6.1	Earthquake Risk	10.14
10.6.2	Liquefaction	10.14
10.6.3	Design Standard	10.14
11.0	Groundwater	
11.1	Geology and Structure	11.1
11.1.1	McArthur River Basin	11.1
11.1.2	Open Cut Area	11.1
11.2	Groundwater Geology and Aquifer Occurrence	11.2
11.2.1	Alluvium	11.2
11.2.2	Weathered and Partially Weathered Bedrock	11.2
11.2.3	Bedrock	11.3
11.2.4	Further Field Investigations	11.3
11.3	Groundwater Inflows into the Underground Mine	11.4
11.4	Groundwater Bores	11.4
11.4.1	Production Bores	11.4
11.4.2	Monitoring Bores	11.4
11.4.3	2004 Drilling Program	11.5
11.5	Groundwater Levels and Flows	11.5
11.6	Groundwater Chemistry	11.5
11.6.1	Mining Area	11.7
11.6.2	Tailings Storage Facility Area	11.7
11.6.3	Borefields	11.7
11.7	Stream Flows	11.8
11.8	Groundwater Models	11.9
11.8.1	Conceptual Model	11.9
11.8.2	Groundwater Flow Model	11.9
11.9	Predicted Pit Dewatering Requirements	11.11

11.9.1	Pit Dewatering Rates	11.11
11.9.2	Effects of Flood Events	11.12
11.9.3	Chemistry of Groundwater from Dewatering Bores	11.12
11.10	Effect of Water Storage in the Underground Mine Voids	11.13
11.11	Groundwater Drawdown Impacts	11.13
11.11.1	Magnitude of Groundwater Drawdown	11.13
11.11.2	Impacts on Other Groundwater Users	11.14
11.11.3	Impacts on Surround Vegetation	11.15
11.11.4	Potential McArthur River Impacts	11.15
11.11.5	Seepage from Tailings Storage Facility	11.17
11.11.6	Seepage from Overburden Emplacement Facility	11.17
11.12	Management and Monitoring	11.17
12.0	Surface Water	
12.1	Overview	12.1
12.2	Regional Surface Water Systems and Catchment Context	12.1
12.3	Hydrology	12.2
12.3.1	General Hydrology	12.2
12.3.2	Flood Hydrology of the McArthur River	12.3
12.3.3	Wet Season Hydrology During Periods of Fish Movement	12.4
12.4	Declared Beneficial Uses	12.5
12.5	Local Surface Water Systems	12.5
12.5.1	Mine Site	12.5
12.5.2	Bing Bong	12.5
12.6	McArthur River Geomorphology and Flooding	12.6
12.6.1	Overview	12.6
12.6.2	Morphological Features of the Broader McArthur River	12.6
12.6.3	Morphology of the Central Reaches of McArthur River	12.6
12.7	Existing Surface Water Quality	12.12
12.7.1	McArthur River Quality Monitoring Program	12.12
12.7.2	Surprise and Barney Creeks	12.15
12.7.3	Water Quality Influences Downstream of the Mine	12.15
12.8	Existing Water Management Strategy	12.15
12.8.1	Existing Mine Site Water Management	12.15
12.8.2	Test Pit Project	12.18
12.8.3	Existing Water Management at Bing Bong Port Facilities	12.20
12.9	Proposed Water Management Strategy	12.21
12.9.1	Mine Site	12.21
12.9.2	Bing Bong Port Facilities	12.27

12.10	McArthur River and Barney Creek Realignments	12.27
12.10.1	Description of Works	12.27
12.10.2	Hydraulic Impacts on River Stability and Geomorphology	12.31
12.10.3	Impacts on Flood Levels	12.40
12.10.4	Impacts on Fish Passage	12.42
12.10.5	Impacts on River Hydrology	12.46
12.10.6	Impacts on Water Quality	12.46
12.10.7	Impacts on DIPE Stream Gauge	12.48
12.11	Construction Impacts and Mitigation	12.49
12.12	Environmental Management	12.49
13.0	Biology	
13.1	Flora – Existing Environment	13.1
13.1.1	Introduction	13.1
13.1.2	Floristics	13.1
13.1.3	Vegetation Communities and Mapping	13.1
13.1.4	Aquatic Plants	13.6
13.1.5	Weeds	13.7
13.1.6	Significant Flora Species	13.8
13.2	Flora – Impact Assessment and Management	13.10
13.2.1	Clearing Schedule	13.10
13.2.2	Realignment of the McArthur River	13.11
13.2.3	Realignment of Barney Creek	13.15
13.2.4	Drawdown from Water Extraction	13.16
13.2.5	Tailings Storage Facility	13.16
13.2.6	Overburden Emplacement Facility	13.16
13.2.7	Effects on Significant Species	13.17
13.2.8	Effects on Regional Vegetation Communities	13.18
13.2.9	Weed Management	13.18
13.2.10	Vegetation Monitoring	13.19
13.3	Fauna – Existing Environment	13.20
13.3.1	Introduction	13.20
13.3.2	Terrestrial Fauna Habitats	13.20
13.3.3	Terrestrial Fauna Species	13.22
13.3.4	Feral Animals	13.25
13.3.5	Significant Fauna Species	13.25
13.4	Fauna Impacts and Management	13.31
13.4.1	Open Cut and River Alignment	13.31
13.4.2	Overburden Emplacement Area	13.32
13.4.3	Tailings Storage Facility	13.32

13.4.4	Effects on Significant Species	13.33
13.4.5	Regional Ecosystems	13.33
13.4.6	Monitoring and Management	13.34
13.5	Aquatic Ecology	13.34
13.5.1	Introduction	13.34
13.5.2	Aquatic Surveys	13.35
13.5.3	Aquatic Habitats	13.34
13.5.4	Aquatic Fauna Species	13.37
13.5.5	Significant Aquatic Fauna	13.40
13.5.6	Project Effects and Management	13.41
13.5.7	Monitoring and Management	13.45
13.6	Biting Insects	13.46
13.6.1	Introduction	13.46
13.6.2	Mosquito Species	13.46
13.6.3	Mosquito Habits	13.47
13.6.4	Breeding Sites	13.48
13.6.5	Project Effects and Management Strategies	13.49
13.7	Marine Biology	13.51
13.7.1	McArthur Estuary	13.51
13.7.2	Bing Bong	13.51
13.7.3	Impact Assessment and Management	13.54
14.0	Cultural Heritage	
14.1	Introduction	14.1
14.2	Measures to Protect Aboriginal Heritage	14.1
14.3	Heritage and National Estate	14.2
14.3.1	McArthur Search	14.2
14.3.2	Bing Bong Search	14.3
14.4	Archaeology and Ethnography	14.3
14.4.1	The Aboriginal Areas Protection Authority	14.3
14.4.2	Previous Archaeological Surveys	14.5
14.4.3	Test Pit Surveys	14.5
14.4.4	Proposed Survey of Open Cut Project Area	14.6
14.4.5	Ethnographic Sites	14.7
14.5	Native Title	14.7
14.6	Potential Impact, Management and Mitigation	14.8
14.6.1	AAPA Certificates	14.8
14.6.2	Measures to Minimise Impact	14.12
14.6.3	Environmental Management Plan	14.12

15.0 Social & Community Effects

15.1	Introduction	15.1
15.2	Land Use and Land Tenure	15.1
15.2.1	The Gulf Region	15.1
15.2.2	Historical Tenure and Land Use	15.2
15.2.3	Current Land Tenure	15.2
15.2.4	Pastoral Industry	15.3
15.2.5	McArthur River Station	15.4
15.2.6	Mining and Extractive Industry	15.5
15.3	Existing Social and Community Trends	15.5
15.3.1	Demographic Profile of the Gulf Region	15.5
15.3.2	Population Distribution and Lifestyle	15.6
15.3.3	Economics and Employment	15.7
15.3.4	Education	15.8
15.3.5	MRM Partnerships	15.9
15.3.6	Health	15.9
15.3.7	Transportation	15.10
15.3.8	Recreation and Tourism	15.10
15.3.9	Current Visual Amenity	15.11
15.4	Social and Community Effects	15.11
15.4.1	Construction Phase	15.11
15.4.2	Operations Phase	15.12
15.4.3	Accommodation	15.14
15.4.4	Education Effects	15.14
15.4.5	Health Effects	15.14
15.4.6	Recreation and Tourism Effects	15.14
15.4.7	Visual Amenity	15.15
15.4.8	Environmental Management Plan	15.17

16.0 Community Consultation

16.1	General Consultation	16.1
16.2	EIS Consultation	16.2
16.3	Community Consultation (2005)	16.6

17.0 Economics

17.1	Introduction	17.1
17.2	Methodology	17.1
17.2.1	Input-output Tables	17.1
17.2.2	Input-output Multipliers	17.1

17.3	Input Data	17.2
17.4	Economic Impacts	17.2
17.4.1	Existing Operations	17.2
17.4.2	Open Cut Operations	17.3
18.0	Health and Safety	
18.1	Occupational Health and Safety Policy	18.1
18.2	Safety Management System	18.2
18.3	Occupational Health Management	18.2
18.4	Behavioural Safety Management	18.3
18.5	OHS Representatives and Committees	18.4
18.6	Accident/Incident Reporting and Investigation	18.5
18.7	Hazard Identification	18.5
18.8	OHS Responsibilities	18.5
18.9	Induction and Training	18.5
18.9.1	Employees	18.5
18.9.2	Contractors and Visitors	18.6
18.10	Job Safety Analysis and Standard Operating Procedures	18.6
18.11	Communications	18.6
18.12	Work Place Hazards	18.6
18.12.1	Hazardous Substances/Dangerous Goods	18.6
18.12.2	Noise	18.7
18.12.3	Isolation and Tagging	18.7
18.12.4	Manual Handling	18.7
18.12.5	Personal Protection Equipment	18.7
18.12.6	Confined Space	18.8
18.12.7	Height Safety	18.8
18.13	Management Plan	18.8
19.0	Risk Management	
19.1	Hazardous Material	19.1
19.1.1	Management System	19.1
19.1.2	Hazardous Substances	19.1
19.1.3	Transportation Storage and Handling	19.2
19.1.4	Fuel and Oil	19.2
19.1.5	Chemicals	19.2
19.2	Risk Management Process	19.2
19.3	Risk Methodology	19.3
19.4	Risk Assessment	19.5

19.4.1	Existing Operations	19.5
19.4.2	Open Cut Project	19.6
19.5	Assessment of Risks from Transport Operations	19.12
19.5.1	Haulage and Shipping Operations	19.12
19.5.2	Risk Identification	19.15
19.5.3	Risk Analysis	19.15
19.5.4	Risk Management and Control	19.17
19.6	Incident Management	19.20
19.7	Emergency Management	19.21
19.7.1	Emergency Preparedness	19.21
19.7.2	Emergency Response	19.23
20.0	Rehabilitation and Closure	
20.1	Rehabilitation Objectives	20.1
20.2	Rehabilitation Strategy	20.1
20.2.1	Exploration and Surface Drilling	20.2
20.2.2	Progressive Rehabilitation	20.3
20.2.3	Revegetation Strategy	20.3
20.3	Mine Closure	20.4
20.3.1	Closure Policy	20.4
20.3.2	Life of Mine Completion Plan	20.5
20.3.3	Closure Criteria	20.7
20.3.4	Closure Commitments	20.11
20.3.5	Final Land Use	20.12
20.3.6	Security	20.13
20.3.7	Closure Strategy – Mine	20.13
20.3.8	Closure Strategy – Bing Bong	20.21
20.3.9	Post Operational Closure Requirements	20.22
20.3.10	Final Site Relinquishment	20.23
20.4	Environmental Management Plans	20.23
21.0	Biodiversity Offsets	
21.1	Introduction	21.1
21.1.1	Principles of Biodiversity Offsets	21.1
21.1.2	Xstrata's Commitments	21.1
21.1.3	Objective	21.1
21.1.4	Scope	21.2
21.2	Conservation Values	21.2
21.2.1	Bioregional Summary	21.2

21.2.2	Landscapes and Vegetation Types	21.3
21.2.3	Important Sites or Ecosystems	21.5
21.2.4	Threatened or Near Threatened Species	21.5
21.3	Proposed Biodiversity Offset Options	21.7
21.3.1	Abner Range	21.7
21.3.2	Glyde River Gorge	21.8
21.3.3	Upper McArthur River	21.9
21.3.4	Caranbirini Conservation Reserve	21.10
21.3.5	Port McArthur Tidal Wetlands	21.11
21.4	Implementation Process	21.14
22.0	Environmental Management Plan	
22.1	Environmental Management	22.1
22.1.1	Management Systems	22.1
22.1.2	Resource Conservation Program	22.1
22.1.3	Environmental Impact Management	22.1
22.1.4	Environmental Incident Management	22.2
22.1.5	Environmental Training	22.2
22.1.6	Environmental Communication	22.2
22.1.7	Environmental Management Program	22.3
22.2	Draft Environmental Management Plan	22.3
22.2.1	Purpose	22.3
22.2.2	Objectives	22.3
22.2.3	Components	22.4
22.3	Construction Environmental Management Plan	22.4
22.3.1	Waste Management Plan	22.5
22.3.2	Air Quality Management Plan	22.7
22.3.3	Noise Management Plan	22.8
22.3.4	Surface Water Management Plan	22.9
22.3.5	Vegetation Management Plan	22.11
22.3.6	Mosquito Management Plan	22.12
22.3.7	Chemicals and Dangerous Goods Management Plan	22.13
22.3.8	Incidents and Complaints Management Plan	22.14
22.4	Operations Environment Management Plan	22.15
22.4.1	Waste Management Plan	22.16
22.4.2	Air Quality Management Plan	22.18
22.4.3	Noise Management Plan	22.20
22.4.4	Surface Water Management Plan	22.21
22.4.5	Groundwater Management Plan	22.24

22.4.6	Biology	22.26
22.4.7	Mosquito Management Plan	22.28
22.4.8	Cultural Heritage Management Plan	22.29
22.4.9	Social and Community Management Plan	22.30
22.4.10	Health and Safety Management Plan	22.31
22.4.11	Rehabilitation Management Plan	22.32
22.4.12	Closure Management Plan	22.34
22.4.13	Biodiversity Offset Management Plan	22.35
22.4.14	Incidents and Complaints Management Program	22.36
